

JEEVAN G BHAT

COMPUTER SCIENCE & ENGINEERING STUDENT & SOFTWARE DEVELOPER

Email: jeevanbhat33@gmail.com Phone: 8431349133 GitHub: github.com/jeevan-bhat LinkedIn: linkedin.com/in/jeevan-bhat

PROFESSIONAL SUMMARY

Dedicated and proactive Computer Science and Engineering student with hands-on experience designing, developing, and deploying robust web applications using React, Node.js, Flask, and relational/NoSQL databases. Possesses a strong academic foundation in Data Structures & Algorithms, operating systems, and cybersecurity principles. Highly motivated, adaptable, and eager to contribute technical acumen to high-performance engineering teams.

EDUCATION

Maharaja Institute of Technology, Mysuru 2023 – 2027
Bachelor of Engineering in Computer Science & Engineering | CGPA: 8.5 / 10.0

TECHNICAL SKILLS

Programming Languages:	C, C++, Python, JavaScript, Bash/Shell Scripting
Frontend Technologies:	HTML5, CSS3, JavaScript, React.js, Responsive Web Design
Backend Technologies:	Python, Flask, Node.js, Express.js, REST APIs
Databases & Storage:	MySQL, MongoDB, Mongoose, PostgreSQL, Supabase
Developer Tools:	Git, GitHub, Linux Terminal, VS Code
Core CS Subjects:	Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Security & Compliance:	RSA, AES, Network Security, NIST concepts, GDPR

PROJECTS

Production Management System	React Node.js Database
- Engineered a comprehensive web-based production management platform to streamline operational workflows and resource tracking. - Designed a scalable client/service/data-tier architecture ensuring crisp separation of concerns and system maintainability. - Implemented dynamic user interfaces, RESTful backend business logic, and robust database operations.	
Resume Builder Application	React JavaScript HTML CSS
- Developed an interactive web utility empowering users to dynamically input, format, and customize professional resumes in real-time. - Utilized advanced state management and reactive frontend components to deliver an intuitive user experience.	
Weather Intelligence Application	Python Flask REST APIs
- Built a responsive Flask-based web application integrating external meteorological APIs for live data retrieval. - Implemented rigorous user input validation, error handling, and clean asynchronous data presentation.	
File Organizer Automation Tool	Python Bash/Shell Scripting
- Created a command-line and script-driven automation utility to systematically categorize and organize cluttered directory structures. - Leveraged file system operations and regex matching to eliminate repetitive manual overhead.	
Short URL Generator Service	Node.js Express MongoDB
- Developed a high-performance URL shortening service capable of generating unique, trackable redirection keys. - Configured optimized database schemas and rapid routing middleware for low-latency redirection performance.	
Streaming Platform Frontend Clones	React JavaScript CSS
Architected pixel-accurate frontend replicas of popular media platforms (Spotify, Netflix) to master complex CSS layouts and component-driven architecture.	

COURSEWORK & PROFESSIONAL DEVELOPMENT

Core Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Cloud Computing, Information & Network Security, Cryptography, AI/ML Fundamentals, Web Technologies, Software Engineering.

Additional Learning: Full-Stack Web Development, Supabase (Auth, PostgreSQL, File Storage), REST APIs, Git & GitHub, AI-powered Application Development.
