

JEEVAN G BHAT

COMPUTER SCIENCE & ENGINEERING STUDENT | FULL-STACK DEVELOPER

jeevanbhat33@gmail.com • 8431349133 • GitHub: github.com/jeevan-bhat • LinkedIn: linkedin.com/in/jeevan-bhat-a26260263

PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience in full-stack web development, Python, React, JavaScript, Bash scripting, databases, cloud computing, and software development. Experienced in building practical web applications using modern frontend and backend technologies, REST APIs, and databases. Strong foundation in Data Structures & Algorithms, computer science fundamentals, cloud technologies, and cybersecurity, with a focus on developing practical and scalable software solutions.

EDUCATION

Bachelor of Engineering – Computer Science & Engineering

Visvesvaraya Technological University (VTU), Belagavi | 2023–2027 | **CGPA: 8.5**

TECHNICAL SKILLS

Programming & Scripting:	C, C++, Python, JavaScript, Bash/Shell Scripting
Frontend:	HTML5, CSS3, JavaScript, React.js, Responsive Web Design
Backend:	Python, Flask, Node.js, Express.js, REST APIs
Databases:	MySQL, MongoDB, Mongoose, PostgreSQL, Supabase
Cloud:	AWS (EC2, S3, RDS, CloudFront), GCP, Microsoft Azure, Cloud Computing
Developer Tools:	Git, GitHub, Bash/Linux Terminal, VS Code
CS Fundamentals:	Data Structures & Algorithms, DBMS, OS, Computer Networks
Security & Virtualization:	RSA, AES, Network Security, NIST concepts, GDPR, HIPAA, VMware, Xen

PROJECTS

Production Management System

React | Backend | Database

- Developed a web-based production management system for managing production-related data and workflows.
- Designed the application using a structured client/service/data-tier architecture.
- Implemented frontend interfaces, backend functionality, database operations, and application business logic.

Resume Builder

React | JavaScript | HTML | CSS

- Developed a web application for creating and customizing professional resumes.
- Implemented dynamic forms, real-time resume content generation, and responsive UI.

Weather Application

Python | Flask | API Integration

- Developed a Flask-based weather application with external API integration.
- Implemented user input handling and dynamic weather-data presentation.

File Organizer

Python | Bash/Shell

- Built a file-management automation tool that organizes files into folders based on file type.
- Applied filesystem operations and scripting concepts to reduce repetitive manual work.

Short URL Generator

Web Development | Backend | Database

- Developed a URL-shortening application for generating and retrieving shareable short URLs.
- Implemented backend logic and database storage for URL mappings.

Spotify / Netflix Clone Projects

HTML | CSS | JavaScript | React

- Built frontend clone projects to practice responsive layouts, navigation, React components, and modern UI development.

COURSEWORK & ADDITIONAL LEARNING

Core Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Cloud Computing, Information & Network Security, Cryptography, AI/ML Fundamentals, Web Technologies, Software Engineering.

Additional Technical Learning: Full-Stack Web Development, React.js, Flask, Node.js & Express.js, MongoDB & Mongoose,

Supabase (Auth, PostgreSQL, File Storage), REST APIs, Bash/Shell Scripting, Git & GitHub, C/C++ Problem Solving, AI-powered Application Development.

INTERESTS

Software Development • Full-Stack Development • Cloud Computing • Artificial Intelligence • Data Structures & Algorithms • Cybersecurity
